The Institute for Education is accepting applications submitted online for the **Award in Educational Neuroscience (MQF Level 6, 10 ECTS)** commencing **January 2026** through a blended learning approach including face-to-face, online synchronous live and asynchronous sessions. All synchronous live sessions are held between 15:30 and 18:00.

### Course Details

Through this programme, participants will be given the opportunity to develop their understanding of ways in which cognitive neuroscience can inform their decisions to further improve the educational and learning experience. The programme will introduce participants to concepts of genetics and brain science. Participants will explore various processes in the brain including executive functioning, attention, working memory, and the retrieval and transfer of knowledge. In doing so, they will analyse and interpret several studies related to cognition and learning to infer changes to better support learners. Following this, participants will observe cognitive and language development from the early stages of life up to adolescence and adulthood including typical and atypical development. In turn, this will lead to further research on the application of neuroscience to classroom practice and how various studies have shown how to harness this development and direct it to improve learning. For more information, please see course description found [here](#).

## Entry Requirements

Applicants interested in following this programme should be in possession of:

- a) An awarded MATSEC Certificate at MQF Level 4, or equivalent; OR
- b) A full MQF Level 4 qualification, preferably in the area of Education, with a minimum of 120 ECTS, or equivalent; OR
- c) An MQF Level 5 Certificate in Facilitating Inclusive Education with a minimum of 30 ECTS.
